Interrogation of Dr. Wilhelm HORTTL: HORTTL's Reaction to the Arrest of VERBER and RWIND

l. Purpose of this Report. The purpose of the present report is to record the reaction of Dr. Milhelm HOSTE and his issediate cromise to the news that Otto VERBER and Kurt PONCER had been arrested together with three other persons for espionage on behalf of the Soviet Union against the United States. HOSTE's reaction is documented in correspondence between himself and his cromise which was impounded in a search of his quarters and office conducted on 25 March 1953. The possibility should be borne in mind that HOSTE deliberately left this correspondence for us to capture in the hopes that the correspondence would establish his innocence of implication in Soviet espionage. It is also possible that the entire correspondence was fabricated to this end,

2. Letter HONTE to MAST, 16 January 1953. In a letter dated 16 January 1953 of which we possess a carbon copy HONTE wrote to Baron Heinrich von MAST. The first two and a half pages of his letter, which begins in German "Pour Harry" concerns itself with other matters. These include the possibility of HONTE's being hired by Ant Cehlen, the business of the Hibelunger Verlag, the espionage activities of Theodor von ALHERT, etc. The relevant passage can be translated as follows:

COM MAN

7.

12.13

What do you say about the odd espionage affair in Visnna? The oddest thing about it is that I actually have known these people for years. I must therefore be a floviet Agenti Joking aside, I still cam't understand. Why did these people never approach me? Only because of my absolutely hestile stitude towards the East? But if they had been amart they would certainly have been able to approach me from some other direction. That is, as members of the American Intelligence Service and thus through me have been able to set up an anti-American net in order later to liquidate it. The matter is quite obscure to me especially this furny connection to a Consul in Mashington when these people were sitting the whole time here, May were they not sent to the United States, which would be the obvious opportunity to have former intelligence officers over there. And certainly such intelligence officers sould also be reactivated there. Everything is most curious. If the Russian Intelligence Service is not more computent than this then I should be very happy. (In any case, I am pustled that I never noticed anything about them which was indicative. I certainly got the impression that they might be working as little in the Israeli Intelligence Service but when I heard this suspicion for the first time months ago from thee's friend in Salaburg friend is a policeman named Johann the Markey.) I could May Ballers it and make a statement giving my can applied that the people chosened were working for the Israelis.) I certainly hope that I won't get drawn into this matter because there would be a good deal of fun for certain people. In any case, it would be a good thing if my correspondence were discovered since the correspondence makes it elser that I dealt with these people only concerning photographs

and concerning the arrangement of export licenses. (That would be an explanation of the fact that nothing happened to these licenses. In any case one would have to check this up in Scandinavia. The two brothers (translator note: VERBER and POWGER) would containly have no interest in arranging to increase the circulation of an anti-Russian book) Please give me your advice on this whole matter, particularly as to what I should do now. Is there any point in my reporting now what I know? I certainly know nothing of professional interest and then one might think that Qui S'Excuse, S'Accuse. They certainly will hardly stuble across my name, since a search of the house and the office in the 4th District is out of the question. On the other hand, I would certainly like to assist in clearing up the case if the people are really guilty. (A certain feeling of revenge exists here on my part because I was taken in.) In toto this is a very strange matter.

3. Letter HOETTL to von ALBERT, 16 January 1953. A carbon copy of a letter dated 16 January 1953 from HOETTL to Theodor von ALBERT reads in part as follows:

"Mat do you say about the new espionage case in Vienna? An odd story. As you already know I know these brothers and considered it out of the question that they could be Soviet agents. If A. (trenslator note: Johann ANGERE, a sub-agent of von ALEET; who works in the Editory Folice) has any particular questions, I am at his disposal, but I would prefer not to be named as a source, since I do not particularly wish to be known as an acquaintance of such people. I should be most interested to know what is at the bottom of the case. Why, for example, did these people never make any attempt to recruit me? I can only explain it to myself by supposing that it was clear to them that because of my clear ideological orientation nothing was to be gained. But on the other hand, they may have attempted to make some sort of play in order to learn my connections. I had really trusted them since I could not believe that OSS officers sould be Soviet agents. It is a point against their prefereismal suspetence if the whole story is relevant. In any case, I will be thankful to A. for any information and will take a personal interest in it."

h. Letter von ALERT to HOETTL, 17 January 1953. An original letter dated 17 January 1953 signed Theo reads in part 22 follows:

THE PARTY.

SEE SE OF

a construction

"The story about Kurt P, is most amosing. The arrest occurred in part because of certain information which was gathered by A, (translator note: ANGER) (partly through me and partly through you,) Therefore, our further conversation had best be oral, I request to know everything that you know about the case because I shall certainly learn a good deal more sysulf."

5. Letter MAST to HORTE, 19 January 1953. MAST's answer to HOSTEL's first letter is contained in a letter dated 19 January 1953 of which we possess the original signed "Harry," This letter is five pages long and MAST devotes approximately one page to the POMMER case early in the letter;

"To get started right away in the P, case. In this auttor I have the option that it is not wise in such a case to ach presentarily. Especially since, if they have found the correspondence within I usual approve of, the hands harmlessness of the affair is clear. The main question, is asy event, is harmlessness of the affair is clear. The main question, is asy event, is harmlessness to know these people. Either plausible suplamention, the point of the correspondence or you have seen other plausible suplamention, the good A (treaslator note; Antificial got these news and whether our friends in Cummdam = N = know more or knew mare about this case. (Treaslated in Cummdam = N = know more or knew mare about this case. (Treaslated in Cummdam = N = know more or knew mare about this case. (Treaslated in Cummdam = N = know more or knew mare about this case. (Treaslated in Cummdam = N = know more or knew mare about this case. (Treaslated in Cummdam = N = know more or knew mare about this case.) If so, then encrimens falsabods could be perpetured. To me this point,) If so, then encrimens falsabods could be perpetured. To me this print. Or double agent activity) going but also in order to establish grantles colleder not only to get a III—Fally (treaslator note; colleder by the farther interrogations activity) going but also in order to establish grantles colleders and strike in any event would preatled by a faret distance. It is therefore not ingering the defined by MERIL, would be the same means of interrogation as well as each confinement between the right of the faret with the case and what is being state for you to write the mark the mark more in Galletter (treaslator note: Karl Ridgs and for you to write the more in Galletter (treaslator note: Karl Ridgs and for you to write the people in the livent, and would be to correspondence concerning that cash with the town will come up but when, as it to be aspected, the people in the brown in all the would be seried questions on the correspondence of the correspondence of the

Note: The letter continues under a deteline of 22 January 1953;

"In the interval events have eccurred which have persponed the urganay of this matter, since now, as is apparent from the nesapapers, the procession has formally indicated the two definitions and the trial is scheduled to begin as I March, From the European prints of view this would need the investigation has been concluded. In our case, however, I will hald to my opinion that for the time being you should de nothing,"

6. Letter HOSTIL to MAST, 23 January 1953. We have a carbon of a letter to MAST from HOSTIL which is dated 23 January 1953. The first page of the letter concerns itself with the MEREM-POWER case.

Taild you by talegree only once yesterday. I say this only to charity this one point. Now let me talk about single points on which I wish to go along with your scheme. In the case of P, I agree with you completely and certainly de not wish to inform any of A's (translator notes MCREER's) people as long as the investigation is still in progrees. However, I have discovered a good solution. In a completely private and personal way I have informed my SCHMEINER friend of this matter (translator notes SCHMEINER friend of this matter (translator notes SCHMEINER is a well-imnous over nems of Gehien) and he asked me to five his a complete written report combarning my acquaintance which would be held with! I specifically gave him the permission to use it. If I should get into my sort of difficulties, I therefore could at any time state that I had given my information to a reputable firm. This idea is undoubtedly good in itself and quite apart from the fact that these brothers also can read the thing (translator note; In this case, "brothers" appears is refer to set Cellen) but Will not note. In this case, "brothers also can read the thing (translator note; In this case, "brothers also can read the thing it came, a former Colonal K (translator note; Wilhelm REICHMEN). In any event, it is certain that not much will Bocome generally known, for the correspondence is located in the lith District and is therefore net available. We copies are at hand and also the answers; the matter concerns itself with photographs for my book (Sanaris, etc.) and also it asserme brothers which I Despit from Pr., especially those from the days of the Habeburg Monarely, but also mints a considerable exchange of letters concerning a bendish edition and possibly there may be steething of this also at the office of the press which you might look up if you have time. The whole matter is therefore as clear as day and I do not believe that there will be any trouble in Salaburg, although I certainly de not have time. The serve that there is something pe

the meantime presumably never in the United States could conspire with a Russian in Washington, when in Vienna he only has to go around the corner to meet the MVD. The situation does not ring true. I am extremely curious to find out what will come of the case. Any further, information that I have on this case I will give you orally.

7. HOSTIL'S Report to Rupert HANDL. As he explained to MAST in the foregoing letter, HESTI, gave to Empert HANDL, a representative of Amt Ochlen, a written report of his association with Kurt PONGER. We have the original of this report from Amt Ochlen and among the papers impounded in HOSTIL's home were three carbon copies of the report. HOSTIL was unable to explain why he made so many copies but stated that it must have been an error of some sort, since normally he makes only one or two copies of any original correspondence. A translation of HOSTIL's written statement to MANDL follows:

"My Acquaintance with Curt PONCER.

THE STATE OF THE PARTY OF THE P

C. L.

"During my stay at Numberg where I was a witness and was confined in the court building I became acquainted with POMER. This was in the year 1966. At that time POMOER and apparently also VERMER were active with the prosecution in the trial against members of the SS Economic and Administrative Office, and had at this time nothing to do with me since I was a witness in the trial against major war criminals, as well as in the secalled Wilhelmstrasse Trial. POMOER, however, was frequently in my vicinity during interrogations as was not uncommon in Numberg. He made a pleasant impression on me at that time since he always handled himself in a homeic and thoroughly sourteous manner in contrast to many other of the interremators.

"About Spring 1948, FONCER came to Alt Amesse in order to request me to come once more to Nurmberg to make a statement. At that time I had just been released from confinement and naturally did not wish to return to Nurmberg, and so I was happy that PONCER actually missed me in Amesse. (I happened to be in Salsburg that day.) Several weeks later, however, FONCER came again and made so urgent a matter of my coming to Nurmberg that I had to give in, although I was living in the U.S. Zone of Austria. Following FONCER's advice I reported to a Mr. BROWERG who had his office in the Landsegaricht in Salsburg and who was responsible for insuing traval permits. When I discovered that BROWERG did not consider the situation as important or as pressing as FONCER, I again adopted my delaying testion and actually succeeded to the extent that in the meantime the trial must ahead without me. At that time, therefore, I did not go to Murmberg, unlike another witness from Alt Amesses whom FONCER and also approached. This was the former Retenian Provincial Director and Minister Pregident during the German regime in the Baltie, Dr. NAE, who also lived in Alt Amesse, MAE, like myself, is a writer with a Strong enti-Committed bias who has a very good reputation in the Estenian Engretion. For some time he has been writing under the pseudonym Polonian a rather important anti-Bolshevik brochure called "No Fear of Soviet Russia,"

"At this time I had already begun working on my book Die Geheime Front and told PONCER about it. He was very interested and stated that he also belonged to the intelligence trade. (He described himself as a former Captain in GSS). PONCER promised me to try to arrange a foreign language edition of the book in the United States and in other foreign countries in which he allagedly had good connections. When my book appeared in 1950, I ment a copy to PONCER with a query concerning the promise that he had made. PONCER replied that my book might well appear in the reputable Swiss Firm Europa and begul, in this connection personal negotiations with the owner of the firm (r.) CHECHT. PONCER got for this a concession which amounted to 24% commission of the sale price. In the United States and in Swaden where PONCER particularly attempted to get a foreign edition, he had no success. PONCER also attempted with no success to arrange the publication of articles on historical and political subjects.

"However, it became apparent at this time (my articles had to appear with illustrations) that PONCER possessed a large collection of photographs which included historical and contemporary political figures so that in this connection we began to do business. I bought various photographs from PONCER, as for example those concerning the first and second world war, and I also gave him photographs which I possessed to be enlarged and copied. In these negotiations a rather large correspondence came into being and I made a number of payments to PONCER which, although the prices were small, amounted to a considerable sum. (On one occasion shoet a whousand schillings.) All these letters from PONCER as well as copies of my letters to him are available. They begin on the 27th of August 1968 and end on the 7th of October 1952. Late in December 1952 I also sent PONCER a New Year card since he had sent me a card at Christmas.

(°...)

"Except for these purely prefessional (Numberg) and sensorial (publishing and photography) matters FCHCER had little other contact with me, During the time of our acquaintance, that is beginning with his second visit to all Aussee in late Spring 1948 until the end of 1952, I saw him purhaps altogether six or seven times; of which three er four times were in Alt Aussee, once in Fuschl, once in End Isahl, and finally in Oursamy where he took me along in his car. However FCHCER was apparently in Aussee on other cocasions when he did not meet me. He usually came without talling me before hand. When he arrived he usually called me by talephone, Once his nife Yers came along and trice his brother-in-law YERER (that is on visits to me) and also his oldest daughter came with him once or twice but I never see her. Fossibly his nother also accommanded him on these visits but of this I cannot be certain. (Naturally it is possible that other persons were also with him.) Usually he connected his journey according to his own account with visits of his family, particularly when numbers of his family were having vestions in Meetern Austria. Thus the FCHCER family had a visit in Samer 1951 to Edecator an Gestachersee (core of Enery) and made another visit in 1952 to Mindischgarsten, Upper Austria. If Mrs. PCHCER fidtlest so he teld no en several eccessione. It would therefore appear that PCHCER came to Meetern Austria frequently and for extended periods. Concerning the subjects of conversation which occurred on the occasions mentioned

above I have certain memories. On his first visit, PONCER interested himself in the chief of Amt IV of the ROMA, HUKLIER, and most especially for the Chief for Jestish matters, Adolf ETGHARM. Concerning EICHARM, he informed me repeatedly that JOINT (OFF some other international Jestish organisation) had placed a result on EICHARM's head of \$100,000 which I was supposed to collect since I certainly knew where EICHARM was, (KICHARM had been in Aussee at the time of the German collapse and had left his family here,) The particular interest of PONCER in EICHARM and in other similar matters, into which I will go later, made we conclude that FONCER was active for the Israeli Intelligence Service or some other Israeli office. This was my explanation at the time to myself of his frequent visits to Aussee, for in Aussee at the time from EICHARM was attempting to learn in this area the present hiding place of KICHARM. He asked me in a rather unsubtle fachion to take up contact with From LIEBL and in any case to look around in her vicinity since he was convinced that EICHARM frequently returns to visit his family. When I refused to have anything to do with this matter, he dropped the subject until about a year age when he told me that Israel now had definite information that EICHARM use being ledged with the Grend Hafti in Egypt and asked whether or not I might be able to astablish a contact. This would be an inertain thing to do and would be paid for from the \$100,000 which had been set as a price on EICHARM's head. I was completely difficent in this matter although I knew that EICHARM was not at the time in Egypt.

"This interest of PONCER in EICHMANN was not the only sign which brought me to the conclusion that PONCER was working for the Israeli Intelligence Service. He told see once (about August 1951) that he knew a number of important people who were vorking in Vissua for the Israeli Service, among them former members of the American Intelligence Service. These persons were extremely interested in the Condenserie Major Palantin. There has a surface and vished to knew whether I knew him. Taking that I did and told them what I knew about TARRA; that is that I considered him a Russian or at least a Communist agent, PONCER also in this impossibility interested in the former Congressman Alliesthelians was particularly interested in the former Congressman Alliesthelians and the Communist Leader Sept MILERIES. (Concerning these people I permitted syself to talk at great/INDEEN for about a year ago I write an article in the Spiegel in which I discussed the Balabovist infiltration thatics of this group. I also discussed them in a book which will appear much in England and the United States.) However, I never got the impression that FONCER himself was interested in TARRA and in the other two people and wished to take up contact with them himself. This would be an explanation of the frequent trips PONCER made to Aussee and also the trips to Isabil where he also frequently visited (FLIMENIS lived in Isabil) which FONCER emplained to me by stating that he was making a photographic seasously under control of the Russian Secret Service in his dealings with me, my information about these three people would have been only positive. The last

SECRET

two times that PONDER visited in Aussee, he did not sleep either in Alt Aussee or Bad Aussee but in Grundless, which he explained to me by saying that he was making a photo study of a wood carver who worked there. It might be eventually interesting in this connection that since approximately last summer a man has been working in the gypsum works in Grundlese who is known as a leading functionary of the KPOs, although not publicly so known, and who is reported to have had his training in Russia. This man's name is LINECK (phonetic) and he lives in that part of Alt Aussee known as Wim. However, PONDER never asked me about this men and I was interested in him only because I have the opinion that the Russians are preparing the Totas Cebirgs as a stronghold for partisan warfars. I have a number of indications of this. It seems peculiar to me that the LINECK mentioned above, who allagedly had a presperous vegetable business, should suddenly take a job in a gypsum works in Grundlese as a common laborer.

"Otherwise, FOMCER did not indicate any interest to me in persons in the Ausses area although he frequently asked about Dr. NAE. I never spoke of NAE but always advised FOMCER simply to visit him if he wished information, Whether FOMCER visited him or not I do not know.

"Concerning other persons, the only name which came up was that of the former Colonel of the Secret Field Police, KRIECHEAUM (sie), PONCER knew that I knew this was and that I also knew him during my confinement, that I knew this was and that I also knew him during my confinement, on in sontact with him. In the summer of 1951 when PONCER visited me in Aussee he told me that he had seen KRIECHEAUM and that KRIECHEAUM would be very happy to see me again, If I wished, PONCER said he could arrange a meeting, I should write KRIECHEAUM a letter since that would be according to protocol, and say that I would be very happy to see him again and PONCER would then arrange a meeting between us. KRIECHEAUM chose as a date the 18th of August, as well as I can reconstruct from the letter of PONCER: that I have; but whether we astually not on that day I me larger exactly remember. It was certainly in the month of August, PONCER brought KRIECHEAUM from Reichenhall to Salaburg and there I also got into the our, as well as I can remember it was KRIECHEAUM's car, and we then drove to Puschl where we drank moffes in a restaurant by the lake. The conversation was confined by the exchange of reminiscences and only at the end of the conversation did KRIECHEAUM tall me that in intelligence circles my friendship with Erichtessman had indeed been a former colleague of nine when I was working fox II in Austria but that since that time we had separated, since MERCHAIN was completely impossible in my opinion, KRIECHEAUM indimented that he was completely impossible in my opinion, KRIECHEAUM indimented that he was completely impossible in my opinion, KRIECHEAUM indimented that he had any definite plan connected with me. PONCER, on the other hand, told me on the return journey (he brought me as far as \$t. Oligen) that this conversation would have good results since KRIECHEAUM would make seen the told had in a communication dated 5 August that KRIECHEAUM would make some definite proposition to me at the meeting on the 18th of August, but

he never told me either in writing or later by words what he meant, I could only guess that it had something to do with cooperation in the Schmeider firm. This activity as middle-men in 1951 and again a year later brought me to the conjecture that PONDER might perhaps be a colleague of the Schmeider group in Vienna with a mission from KRIECHRAUM, who had the reputation of being a first-rate specialist in Southwast matters. In any event, I never asked him about this and later observations brought me to a different conclusion. I guess that at that time and earlier PONDER was doing some sort of business with KRIECHRAUM concerning which I will write more later.

"In September 1952, PONGER visited me again in Alt Aussee. He was there only about an hour (that is at my house) on which occasion he asked so whether I might care to make a visit to Germany with him and with him brother-in-law in October. A proposition which he had first suggested a year before this. (We had occasionally talked in such a way that I indicated that I occasionally had business to do in Germany but that I PONCER at that time had suggested that I go with him in his car when he went to Germany. Whether he actually went to Germany in 1951 I cannot remember.) FORCER also suggested that it would be very nice at this time had suggested that it would be very nice at this time research;) Forces also suggested that it sould be very nice at this time to speak again with KRIECHRAUN, since now the question of a German Intelligence Service was becoming acute and until the astablishment of the German Intelligence Service I had held my plans in abeyance. I had actually on several previous occasions told FONGER this after he had several times urged me to take up contact with MRIECHEAUM and to place my capabilities in the intelligence field at the disposal of the Schneider firm. On this decasion it would be possible for us therefore to speak to KRIECHMAIN and he would arrange the itinerary in such a way that it fitted most conveniently my interests. He suggested a meeting with KRICHHAUM in MIRCH-MAUM's residence in Reichenhall on the weekend of the lith to 12th October but I refused this since I had scuething else to do that weekend. On the 1)th of October, I travelled to Salsburg where Walter LAUSER fetched as from the train, FONGER had introduced me to LAURER several days before in Ischl, At that time I had been in Ischl and FONGER had called my wife in Alt Aussee who told him that eventually he could find me in the railroad station restaurant. He came there and I went outside with him briefly where he introduced me to LAUMER in order that I would recognise him in the event that he could not personally pick me up in Salaburg. On the lith of October, LAUSER came with his Volkswagen and drove me to Reichenhall where PONCER had put up in the Hotel Deutches Hous or Doutcher Hef. PONCER had already put up in the Hotel Deutches Haus of Deutcher Har, FORCHE had already spoken with KRIECHRAIN but KRIECHRAIN was no longer in Reichenhall, having arranged to meet us in Humich. We met KRIECHRAIN in the restaurant near the bus stop by the Hotel Schottunhesmal (afternoon of 1) October). The conversation was again purely theoretical as it had been a year before and KRIECHRAIN indicated that the situation in the German Intelligence Service was still completely unclear, saying that the Americans naturally would never let a sun like Dr. Schneider (translator note; Oshlam) be dismissed and that this man would play an important Fold In the Cuture, etc. Nothing concrete was discussed at this meeting. KRIKCHRAUM gave the impression of being very sick and stated that for several months he had been demorately

SFCL

ill. Several days before my journey, I had learned through a criminal police officer attached to the State Police in Salaburg by the ness of ANGEER, not directly but through cut-outs, that Curt FONER was suspected in Vienna of working for the Soviet Intelligence Service. (It was in another connection that the ness of FONER had once up.) I had consequently passed to ANGEER a written memorandum stating that I knew a certain Curt FONER and telling that I knew about this man. This journey with FONER seemed therafore much more interesting, since I hoped to get the opportunity to be able to make conclusions about FONER. I had the greatest doubt that FONER could be a Soviet agent, since his entire activity during the past year, at least as far as I could see, indicated otherwise. The man had been a Captain with OSS, was then an official in Nurnberg where in the last stages of the trials that performing note of 1945-46 had ended smong Americans. He then get the concessions of American agencies in Austria and he had then arranged that my book, The Gebries Front, a work neat offensive to Russia and to Communian which had been forbidden in the Soviet Zone and which had been subject of hostile standard had been policy FONER behaved in a completely unavapictous fashion, he showed no interest in what I was doing, and we practically never see each other except at certain meals. It was admittedly unusual that he should have something to discuss with KRIECHRAUM which he did not wish to speak of in my presence, and he arranged with RRIECHRAUM which he don't wish the speak of in my presence, and he arranged with RRIECHRAUM that he could talegraph from some point along the way to arrange a further seeting between the two. Matther this meeting occurred I do not know. I travelled with FONER and LAUBER and LAUBER on the 15th of October to Numberg, I immediately took the train on to Busseliciar shere I had business and there did not neet FONER and LAUBER again, until the 18th of October when I met them in Bonn. Meen they arrived I had

"After becoming more of the arrest of PONCER and VERDER, I decided to inform the office of Dr. Schmeider and hereby set down as an aide memoir information which substantiates my oral report. This material is to be used only with my emplicit permission—that is, without my specific permission it commet be forwarded to my affice, (francister noise; When questioned on this statement, HOTTL admitted that he specifically meant it could not be forwarded to an American office, He stated, however, that his main reason for this was to ensure security, since he was not source of the extent to which disseminations were made incide Gehlen's organization and he actually hoped to restrict dissemination to General Gehlen's nature of thereby to the really responsible American officer.)

William France

"In closing I should like to set down several details of the whole matter which might be interesting in this or in some other connection. In all my conversations with POMCER, as far as I can remember, the names of former intelligence people never occurred with the exception of those already mantioned and two others which I wish to discuss here. The first is one Or APPEZZAREK who is said to employ the tover name Orl ACHAPPED. I mentioned this name to Forces, 48 I believe, during the convergation described the convergation of the 37.73 cribed above Detween PONCER, KRIECHBAUM and myself on the 13th of October in Hamich. (Now the convergation came around to OFCZAREK/SCHARPER I no longer remember,) I was astounded when suddenly PONGER uttered the name OFCZAREK whom I know from my student days. As far as I can remember on this occasion POHTER stated that CIC was very angry with OFCZAREK because he continued to work against the agreement that had been reached between CIC in Austria and Schneider. Curiously enough, on the return journey from Munich we not OFCZAREK in his car at the German Austrian border. had already finished my business with customs while PONGER and LAURER were still engaged in conversation concerning books on which they had to pay sustoms and on which PONCER did not wish to pay the duty. PONCER came out from the customs shed and made some statement that it was not particularly skillful when somebody like OFCZAREK was passed through the customs se rapidly that any blind man could see that the man had been socredited officially in some manner to the border police. Whether POMOER or LAUBER had spoken with OPCZAREK during the customs inspection is not known to me but I doubt it, since otherwise OPCZAREK would not have been finished so quickly. I also do not know whether PONOER knows OFCIAREX personally. quickly. I also do not know whether PCNCER move OFCEREE personally, Concerning Dr. OFCEREE, I should like to state that exactly as in the case of Colonel KRIECIERIM any suspicion that he is working for the Russians wis FONGER seems impossible. (From other quarters such rumors about OFCEREE in Austria have repeatedly conductor statements with his acquaintance with Dr. Kury ESSELY, who allegedly is active for the Russian or Hungarian invaligance service. Concerning this a good deal is said but I personally do not believe that OFCEREE, who had apployed WESSELY in his intelligence grown and allegedly still scales. a good deal is said but I personally do not believe that OFCEARE, who had employed MESSELY in his intelligence group and allegedly still employs him, knew snything about MESSELY. It could possibly be emplayed by a certain good nature on the part of OFCEAREK as in the case of OFCEAREK as of his calleague Piofesser Knyt WOLL. This younger MCLL is a Communist Unity Front Shop Steward in Yours and is reported to send OFCEAREK information through his father economism this business. The senior DCCL appears to be absolutely reliable but apparently cannot, for obvious reasons, separate himself from his son.)

The second mass which seems interesting in an intelligence connection is that of the former 68 Obersturnhahnbahrer Josef RIAM. Concerning this man PCNOER had astoundingly good information. He teld we two years age that URBAN was an agent of the American, British and Franch Intelligence Services as well as of the intelligence service of the American State Police, but that this had no hindered him from becoming intelligence chief of the Head group of ENCIES. A remark of PCNOER's made a long time ago ands it moved to me at that time that URBAN also had connections with the Israeli

Intelligence Service. The reason for these assumptions are no longer clear to me since I didn't have any interest in URBAN, believing that he is not a man to be taken seriously.

"Several points which possibly may also be of interest I will also add here. FONCER's earlier address was Vienna V, Schoenbrunnerstrasse h7. Later he gave me the address Vienna IV, Paulanergasse 7 as the location of the firm of the Central European Press and Literary Agency, Inc. When I once asked him how an American could live in a Soviet Besirk, he explained to me that there both offices and spartments are chesper by half than in the Mestern Sectors, and snything that he has to hide from the Russians he would not keep in the hth Besirk, Later, in 1952, FONCE told as on his own initiative that an American officer, apparently the one who was his superior in the Officers' Reserve, summoned him to advise him to move out of the Soviet Besirk. He allegedly gave this officer his arguments that the Soviet Besirk was much chesper and convinced him saying that his brotherwin-law VERBER, for example, had taken years to find a decent duelling in a Western sector,

"Another item, perhaps not uninteresting, is the following, When I first met VERBER (if I recollect correctly I have seen him altogether only trice) he had a completely swellen eye. Asked where he got it, he stated that with FOHOER he had photographed striking workers near the Psulanericirche and that both he and PONCER had been beaten up and that someone had stolen a Loica from them,

"Finally a few characteristics concerning the personalities themselves. "Finally a few characteristics concerning the personalities themselves, PCMCER has always seemed to me to be the prototype of the very nationally—minded Jew. According to a number of his statements he fait himself much more a Jew than an American, For this reason, he was always leyel to the Germans and always realistic about them (sie). To me he was always pleasant and humane without ever making an attempt to win my favor by any kind of special attention. Thus he never made any attempt to pay for made when we were together or when he came on a visit did he bring gifts to my children. He was always years reasonable in the prices that he mut on him children. He was always very reasonable in the prices that he put on his photographs but not so much so that he gave up his profit. He never tried to get information from me about enti-Russian agents, as would certainly have been expected if he had been working for the Russians. That he never attempted to recruit me for the Russians goes without saying for he knew my unqualified enti-Communist orientation. He could, on numerous occasions, have attempted to approach me obliquely, perhaps for example as an alleged member of an American intelligence office who wished to build a not against Russia. In this I would probably have believed him and it would have been a good opportunity for a double agent operation. This circumstance mitigates against graphedon; that which supports empision I have set down above.

Land Same State of

"PONNER's wife, whom I saw only once, impressed we as an extraordinarily clever and self-assured person. I am trying to indicate that in the marriage she is probably the dominant partner and if this is a matter of intelligence work, she may also have been the dominant member there,

\*PONCER in my opinion was always the passive partner. Presumably also in sexual matters for she impressed me as being a very highly-bred and temperamental moman, whereas he appears to be the opposite.

"Concerning the brother VERSER I have only slight impressions, He appeared to be very clever, obliging, but also practical. If, for example, PONCER started on the subject of the persecution of the Jews in connection with his favorite hobby horse EICHMANN, VERBER would hush him up saying that all this did not appear to be particularly an important problem for me. VERBER was also always very witty and full of jobss.

"LAUBER impressed me as being very reserved and moderate rather than sympathetic. He demonstrated absolutely no political interest and in his presence nobody could imagine that he could be a Soviet agent, His release tends to support this assumption. It is naturally vain to develop theories whether and why FONGER and VERBER were Russian agents and in my event the trial at the beginning of Narch will clarify this situation. If it should happen that the accusations are true, then I am convinced that Hrs. FONGER and her brother were the driving force and indeed not from ideological grounds but for money. FONGER was ideologically not a Communist but rather an anti-conservative, that is a man in favor of the liberal, strongly Jewish direction of the Roosevalt Era rather than that of the United States of today.

"One can also imagine that this entire espionage case has been set up in certain Jewish circles in order via the trial to indicate how innecess these "new Americans" (that is Jews) are and how they have been persecuted, This theory, however, is very far fatched, although a man like PONCER would be available for such a job at any time and also possesses the necessary good connections to international Jewry.

Transie de la constante de la

"All of these trains of thought have been set down here in a completely unsystematic fushion and it is possible that some interesting detail has been left out in spite of my sudgaling of brains. I am ready at any time to provide further information but must again request that this case remain completely confidential and not be brought into general use. At this point I want to have it again clearly understood that I have no suspicion myself against Colonel EXICHMAIN or Dr. OFCZAREK and that these gentlemen in my opinion are completely beyond all suspicion. I have only spoken of them because as an old intelligence man I know that in such a case the most unlikely details can be of interest and not in any way to point suspicion in any direction. It would be most unpleasant for me if any ninunderstanding should arise against the persons named or if indeed any investigation should be conducted."

8. Letter MAST to HORTEL, 26 January 1952. The original of a letter from Baron Heinrich MAST to HORTEL dated 76 January 1952 is in our possession. The following short paragraph pertains to the FONORA case:

in minist

"I am happy that my opinion concerning this case, which might not be entirely clear, is shared by other persons. Whether the "deposition" was well chosen, I cannot in my position judge since I do not know the people concerned, that is your contact man. I believe that I would not myself, have given it to the tall guy," (Translator note: The reference to the contact man is probably to MANDLY the reference to the tall man is obscure but may refer to a friend of Anton BOSSM.)

9. Letter HUETTL to MAST, 27 January 1953. In a letter, of which we possess HUETTL's carbon copy, dated 27 January 1953, HUETTL devotes only a short paregraph to the FORMER case.

33.30

F35.25

"The deposition in the PCHGER case to me seems quite secure and naturally it will not reach the tall man. The release of the third arrestee makes our version of the case still more likely."

10. Letter from HOETTL to Elizabeth FRANKE, 31 January 1953. Among the Letters in HOETTL's possession which were impounded, two may refer to the PONGER case. It should be noted that FRANKE is the secretary of a former colleague and superior in the SD of HOETTL, Will's AMEK, who now lives in Humich and with whom HOETTL has at least casual contact. We tone of this correspondence indicates that FRANKE is a present or past mistress of HOETTL.

"The address of Kurt you presumably found in a Manich directory? It is certainly four good friend who was previously in Munich for some time and the other Kurt simply lets you hear nothing from him? Have you written to him that I should syself like him to write as a favor? Perhaps it might atill work."

The other letter from Elizabeth FRANCE is dated 2 October 1952, and therefore was apparently written before HOETT, made his trip to Germany with PONCER and his friends. It has one short paragraph which may refer to the PONCER once.

"Curt P. I have just asked about LIEBHART. So far as one be remembered I already once before interviewed him with negative results. As you know, we once debated this question before the first of the year, possibly already two years age, and I remember that at one time after that I conversed with Oart P. The exact time was some time distant in the past. In any same, I'm following up this matter,"

11. HOPTIL's report to Rolf E, RINGER of CIG. According to Report 8-16996 CIG Salabury dated 3 March 1953, Special Agent ROLf E, RINGER "interviewed subject in the German languate in Red Ausees, Land Styria, Austria," RINGER continues as if the report were based solely on an oral interview, Bridently during this interview, housever, RINGER saked HORTIL to prepare a written report on his connections with PONGER and VERSER, for smong the documents impounded in HORTIL's home was a receipt dated Bad Auseee, 21 Pobruary 1953, signed Rolf E, RINGER, which reads as follows:

·· •)6¥

"A written report of 12 pages length concerning his acquaintance with Curt PONGER, Otto VERBER, and Walter LAUSER, received this date from Dr. Wilhelm HOETTI, Alt Aussee and certified herewith with signature, Rolf E. RINGER."

Also among the documents impounded in the house search is a carbon copy of a 12 page report which HOSTTL states is the one he gave to RIHOER on 21 February. RIHOER's report S-16996 is essentially based on the report handed him by HOSTTL and HOSTTL's report will consequently not be reproduced here. The report parallels closely that given to Rupert HAMDL.

CHE WILLES

 12. Comments. From the correspondence detailed above, it would appear that HOETIL was unsitting in his association with Curt PONGER and the Tophola complex. It should be noted, however, that the fact that all of this correspondence was so casily accessible in HOETIL's house leads one to suspect that HOETIL intended us to capture it and from this suspicion it is a short step to the suspicion that all or some of the correspondence may have been fabricated for the purpose of giving us documentary evidence which appears to clear HOETIL of suspicion and that other more incriminating correspondence has been destroyed or hidden elsewhere. The fact that also confiscated at the same time were numerous records of HOETIL's cleardestine activity which, as he points out himself, establishes his clear anti-Soviet record in espionage, albeit detracting to a degree from his reputation as a master in the trade, is consistent with the theory that the material was deliberately left in his house. It is interesting that none of the CIC reports from 1947 and 1948 were to be found smong HOETIL's material, although we very strongly suspect that carbon copies of these reports exist, and in some cases, through an agent of HOETIL's maned Raimund STRANCE, we have at times in the past seen carbon copies of reports which he had in previous years given to CIC Lins. The absence of the material from 1947 and 1948 suggests that HOETIL possesses another cache of material, the whereabouts of which we do not know. It is also possible that other material, including compromising sydence, may have been destroyed in the interval between the public amouncement of the arrest of VEREER and FOMEER and our approach to HOETIL on 19 February. It is hoped that further interrogators do not have high hopes of getting more out of HOETIL them has already been gottes.
